**Cosa dice il nuovo codice della strada?**

La legge 1° agosto 2003 stabilisce che gli autoveicoli, i rimorchi ed i semirimorchi con massa superiore a 3,5 t. devono essere equipaggiati con strisce posteriori e laterali retroriflettenti in ottemperanza a quanto previsto dal Regolamento ECE/ONU 104.

Il nastro per segnalazioni sagome veicoli, è omologato in conformità al Regolamento ECE/ONU 104 ed è la perfetta soluzione per il rispetto del Nuovo Codice della Strada.

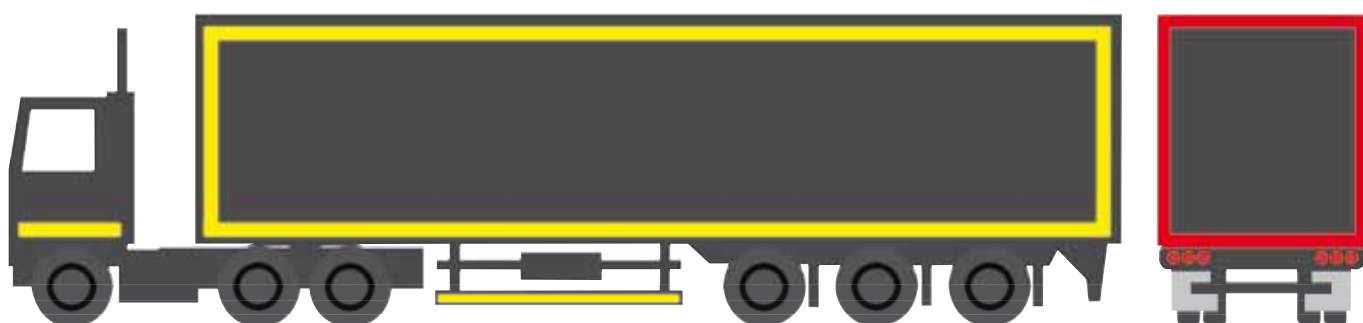

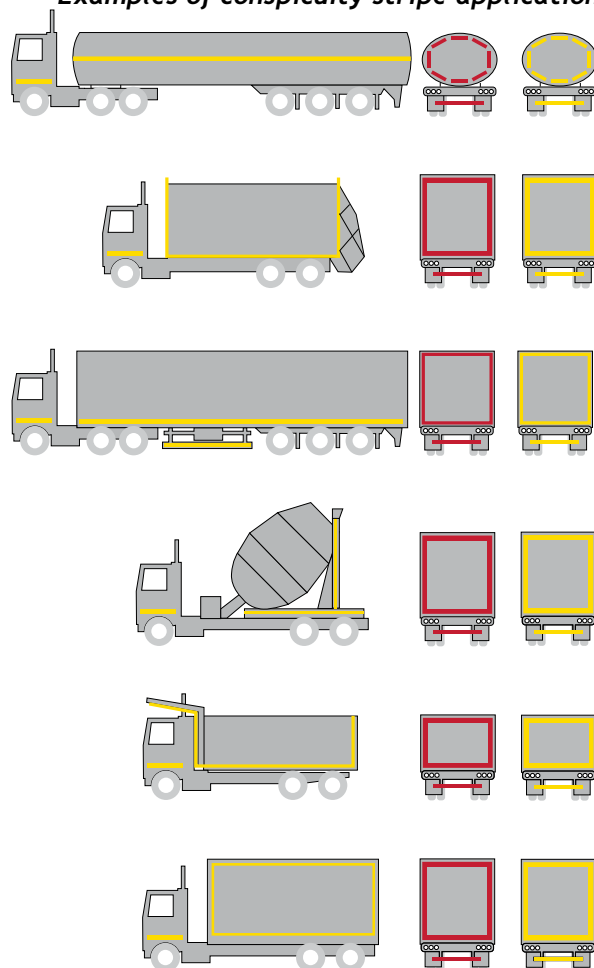

*41% di incidenti in meno in condizioni di scarsa visibilità\**

\*Report DOT 809222, NHTSA, Department of Transportation, National Highway Traffic Safety Administration Washington, DC 20590

- **Riduzione degli incidenti**
- **Maggiore sicurezza del guidatore**
- **Miglioramento dell'immagine aziendale**
- **Facilità di applicazione**
- **Elevata rifrangenza**
- **Monostrato-resistente agli impatti**
- **Disponibile per superfici rigide e telonate**
- **Resistente ai solventi e ai lavaggi a pressione**

Il nastro omologato per segnalazioni sagome veicoli, rendendo maggiormente visibile il mezzo, permette agli altri guidatori che sopraggiungono un maggior tempo di reazione in condizione di scarsa visibilità e nelle ore notturne.
