**PRODUCT GUIDE**

warning lights    reversing alarms  
worklamps    camera systems

A DIVISION OF

ECCO Group, Europe

ECCO Group, USA

ECCO Group, Australia

Vision Alert has designed and manufactured innovative lighting solutions since 1994, providing customers with enhanced visibility and increased safety worldwide.

As part of the ECCO Group, one of the world's leading manufacturers of reversing alarms and lighting products and sister company to Hazard Systems, the Australian market leader in lighting products for the emergency services, Vision Alert can draw on years of specialist expertise in the industry.

More recently the ECCO Group has expanded with the purchase of Preco

Safety Products, a leading US manufacturer of vehicle safety products and Delta Design, the European market leader in xenon technology and industrial warning safety.

Vision Alert operates from a purpose-built, 3,000m<sup>2</sup> state-of-the-art facility in Leeds servicing our customers in a wide variety of markets including OEMs, construction, agriculture, recovery, utilities and the emergency services.

## Guide to Symbols used throughout this catalogue

### Fittings

- = 1 Bolt
- or = 2 Bolt
- = 3 Bolt
- = 3 Bolt European fitting
- = 3 Bolt US fitting
- = 4 Bolt fitting
- = Magnetic
- = DIN Pole
- = DIN Flexi
- = 1 Bolt Flexi
- = Product supplied without bulb. Please order 12V or 24V bulb as required.

### Other Symbols

- = Amps
- = Flashes per minute
- = Dimensions
- = Height
- = Approvals
- = Watts
- = Decibels
- = Flash Patterns
- = Standard light output <1,000 Lumens
- = High performance light output 1,000 - 2,000 Lumens
- = Ultra performance light output 2,000+ Lumens
- = LED module
- = RotoLED module
- = LED module
- = Xenon module
- = Rotator module
- = Halo™ round module
- = Worklamp
- = Safety Director
- = Stop, Tail Lights
- = Stop, Tail, Indicator Lights
- = LED Stop, Tail, Indicator Lights
- = Mirror
- = Stud Connector plus ground
- = Stud Connector
- = Lead Wire
- = ECE R65 approved
- = Meets US SAE Class 1 output
- = Meets US SAE Class 2 output
- = Meets US SAE Class 3 output
- = The relevant Electro-Magnetic Compatibility approvals have been granted for these products. May include "e" ECE R10 or CE national equivalents.
- = Ingress protection. xx denotes protection level.

95 - 99

PSUs and Flasher Units	95
Switches and Switch Packs	96
Plugs, Sockets, Accessories	97 - 98
Fixing Kits	99

LED products from Vision Alert represent the cutting edge of warning light technology. LEDs are durable solid-state devices that are highly resistant to extreme environments, shock and vibration. This coupled with Vision Alert's robust housing designs provide fit-and-forget warning solutions with maintenance-free longevity of many years.

## Major LED advantages

**Safety:** LEDs have extremely fast on/off times, reaching their peak brightness instantaneously which makes them perfect for attention getting warning applications.

**Efficiency:** LEDs are highly energy efficient, requiring much lower current draw... up to 90% less than a conventional lamp. Not only does this reduce strain on the electrical system extending the life of the battery and alternator, in many applications it saves fuel and engine wear as vehicles no longer have to idle to keep warning lights running and the battery charged.

**Longevity:** Typically LEDs are rated to last for more than 50,000 hours of "on time" so lamps will operate for many years before needing a replacement. Savings on operating costs can be extreme when vehicle down time, replacement parts and labour costs are factored in. Fuel savings often present the greatest savings as the need to idle a work vehicle too operate warning lights is eliminated.

**Size and Features:** Even the most powerful LEDs are extremely small, typically no bigger than a match head. In turn the housings for LED products can be much smaller than conventional lighting fixtures. Many LED warning lights also offer advanced features like intensity adjustment, multiple flash patterns and the ability to synchronise products with each other to create unique warning systems.

## Types of LEDs

### Types of LEDs

There are 3 main types of high intensity LEDs. Each emits a different Radiation Pattern using a Primary Optic placed over the LED.

### Lambertian

Named as their light output obeys Lambert's cosine law, a Lambertian LED has peripheral intensity directly proportional to the cosine of the angle from which it is viewed. In lay terms the LED produces a very bright focused beam, typically within 20°. This is the most common type used in warning lights.

### Batwing

The Batwing pattern emits light typically within 45° and contains a low level of forward light output and a significant level of sideways light output. It is so named as the pattern resembles a bats wing when viewed on a polar plot. This is considered the optimal pattern for room lighting.

### Side-Emitting

The Primary Optic attached to a Side Emitting LED has an hour glass shape which directs the majority of light from the LED out the side. This type is typically used in flashlights where a reflector is used around the LED to focus the light beam as desired.

## Top 5 LED myths

### LEDs last forever!

LEDs fade slowly over time rather than suddenly fail completely, a process known as Lumen Depreciation. While they don't last forever, well designed LED products can have operating lives of 50,000 hours, that's nearly 6 years of constant on time.

### LEDs aren't as bright as other light sources!

The accepted method of comparing lumen (lm) output of conventional lamps and LEDs is misleading as it fails to account for wasted light and the design of the housing. A better measure is delivered light, the amount that is actually projected by a product, this is measured in lux (lx). In this comparison, good quality LED products typically perform significantly better while consuming far less energy.

### 3-watt LEDs are brighter than 1-watt LEDs!

People are used to determining light output based on watts due to the ratings on incandescent bulbs, more watts = more light. This is not true of LEDs. Bulbs are inefficient and the only way their output can be increased is to increase power input (wattage). LEDs are highly efficient and different housings and materials can vastly affect the amount of delivered light regardless of wattage.

### LEDs don't generate heat!

LEDs produce no Infrared energy so the beam of light they produce is cool. However the LED itself generates lots of waste heat converting electricity into light. Waste heat must be efficiently removed from an LED

product to maximize performance and avoid damage to the LEDs. Heat removal is accomplished via carefully engineered heat sinks that draw heat away from the LED and dissipate it into the surrounding air.

### LED products cost too much!

Initial cost for LED products may be higher for some lighting solutions but this does not account for total cost of ownership. Long, maintenance free service lives and low power consumption mean that the total cost of buying and operating an LED product is typically much less than conventional lighting.

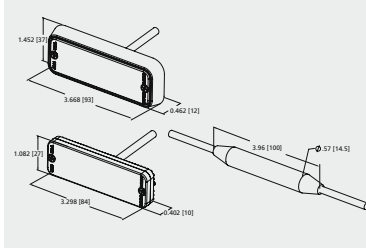

# Directional LEDs

With the new additions to the range and the incorporation of Delta Design products, Vision Alert boasts the largest range of Directional LED lamps on the market today. Whether the need is for large or compact, standard output, high output ECE R65 approved, flush mount or bracket mount, the range covers every need. Featuring 15 different product groups and countless colour and performance options, there's never been a range quite like this.

Included in the range are compact 3510, 3730 and Stick-A-LED products. There is the original Hide-A-LED range, the world's first discreet headlamp mounted warning lamps. Alongside are the flush mount 3931/32 lamps, high output Securileds, 3700 and new 3811 lamps, the unique Rearguard LED (along with the xenon option), the all-new 3600 series of interior mount front dash and rear window deck mounted lamps and finally the original VigiLED and the new ECCO designed lamp, the VigiLED II.

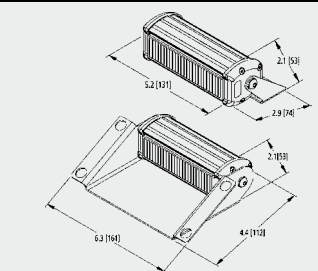

### 3510 Surface Mount

	Volts	Max Current	Colour
3510A	12V	0.75A	Amber
3510B	12V	0.75A	Blue
3510R	12V	0.75A	Red
3510C	12V	0.75A	White

 Flash patterns
  EMC
 Compact slimline solution.

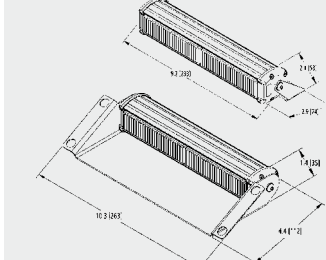

### 3611 Single Head Grille/Deck/Dash & Window Mount LEDs

	Volts	Max Current	Colour
3611A	12/24V	0.55A	Amber
3611B	12/24V	0.55A	Blue
3611R	12/24V	0.55A	Red

3715B	12V	0.4A	Blue
3725A	24V	0.2A	Amber
3725B	24V	0.2A	Blue

Heavy duty, hard-wearing proven performance

- Die cast aluminium housing
- LEDs rated at 100,000 hours operation
- Other colours available
- Can be synchronised
- Operating temps range: -30°C to 50°C
- 4 wide angled LED optics

## 3730 Series LED

	Volts	Max Current	Colour
100.460	12/24V	0.2A	Amber
100.461	12/24V	0.2A	Blue
100.462	12/24V	0.2A	Red

Heavy duty compact design

- As 3700 but with following differences:
- 3 wide angled LED optics
  - 14 flash patterns including 3 integral alternating flash modes
  - Other colours available
  - Aluminium housing

## 3736 Series LED

	Volts	Max Current	Colour
3736A	12/24V	0.2A	Amber
3736B	12/24V	0.2A	Blue
3736R	12/24V	0.2A	Red

Cost-effective solution

- Other colours available
- ABS housing

## Fixing Kits for 3730 and 3736

# Directional LEDs

## Securi LED

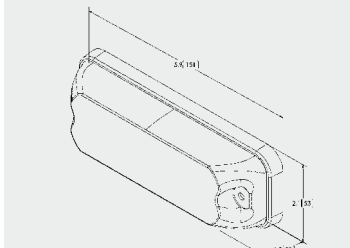

Surface Mount	Bracket Mount	Max Current	Colour
497032	497042	1.5A	Amber
497034	497044	1.5A	Blue
497033*	497043*	1.5A	Red
497031*	497041*	1.5A	White

\* Non ECE R65

Perfect where a large light footprint and high output is needed

IP67, EMC

## 3811 Series LED

	Volts	Max Current	Colour
3811A	12/24V	0.26A	Amber
3811B	12/24V	0.26A	Blue
3811R	12/24V	0.26A	Red
3811C	12/24V	0.26A	White

Super-bright, long range directional warning

- 20 individual high intensity LEDs • Thirteen flash patterns
- Clear polycarbonate housing

Flash patterns IP67, EMC

## VigiLED

	Volts	Max Current	Colour
497022	12/24V	0.12A	Amber
497024	12/24V	0.12A	Blue
497023	12/24V	0.12A	Red
497021	12/24V	0.12A	White

The original and favourite large square light footprint

- Triple flash • Synchronise and alternating synchronise
- Flush or pendant mount

IP69K, EMC

## VigiLED II

	Volts	Max Current	Colour
ED0001A	12/24V	0.7A	Amber
ED0001B	12/24V	0.7A	Blue
ED0001R	12/24V	0.7A	Red
ED0001C	12/24V	0.7A	White

Amber and blue versions have ECE R65 compatible output

The VigiLED brought up to date with 4 high power LEDs

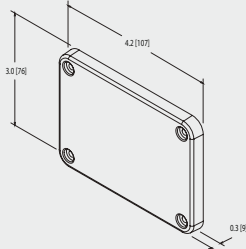

- Four high-intensity LEDs • Synchronise and alternating synchronise
- Flush or pendant mount

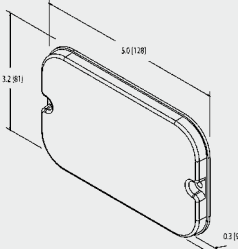

Flash patterns IP67, EMC

# Beacons

Vision Alert offers a beacon for all applications, including a comprehensive range of on and off highway models, medium and heavy duty, agricultural and industrial.

Comprising more than 25 different beacon models and endless variations of colour and mounting, the latest range includes traditional halogen, reliable xenon strobe and the latest developments in LED technology to bring you solutions for every conceivable application.

## ROTATING BEACONS

Trusted by our customers over the past 20 years, the Vision Alert 400 and 500 series rotating beacons feature super quiet, long life bearing assemblies, coupled to *Free-form* optics to increase light by around 20% and are ECE R65 approved where applicable.

### FREE-FORM OPTICS

## LED BEACONS

As LEDs become more cost-effective and with improved performance, LED beacons are becoming more and more the sought after technology for warning lights. New additions include the ECE R65 400 series LED beacon designed to complement the R65 xenon range. Of importance to our overseas customers Vision Alert now has SAE Class 1, Class 2 and Class 3 LED beacons, superior in performance and comparable in price to the traditional xenon equivalents.

## XENON STROBE BEACONS

With a longer life than rotators, strobes offer exceptional performance in demanding environments. Now available in outputs ranging from low power 2W beacons for minimum disruption in low light confined spaces, through to US SAE Class 1 and ECE R65 high output versions. Whether it's style, performance, size or price there is a xenon strobe beacon for every application.

Inside every Vision Alert beacon you will find a wealth of technology backed up by relentless testing to the demanding ECCO Group standards.

#### Compact beacons feature:

- Xenon power outputs from 2W to 15W available
- Mid range LED available as an alternative to xenon
- 5 mounting options

#### 400 and 500 series xenon/LED beacons feature:

- Standard double flash or high output LED
- Replaceable long life xenon tube or long life LED
- 7 mounting options
- ECE R65

#### 400 and 500 series rotating beacons feature:

- 55W or 70W halogen bulb option
- Ultra quiet rotator bearing and drive belt assembly
- 7 mounting options
- ECE R65

#### Heavy duty xenon beacons feature:

- High profile lens for maximum visibility
- Long-life flash tube assembly
- Up to 5 mounting options
- ECE R65

#### Heavy duty LED beacons feature:

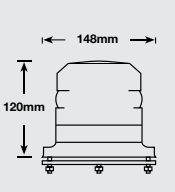

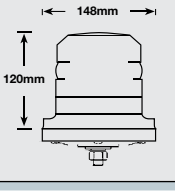

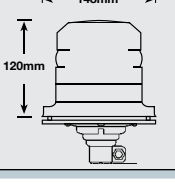

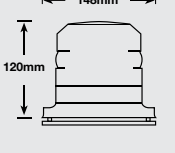

- SAE light output approved options
- Reliable ultra-long life
- Secure 3 bolt mounting for rugged operations
- Adaptor available for European 3 bolt mounting
- Strong die-cast metal base options available as well as ABS
- Magnetic option

#### Special purpose beacons feature:

- Incandescent bulb or new state-of-the-art LED in static flash beacons compliant with airport regulations CAP 168
- Compact and robust designs that have set industry standards around the world
- Voltage ranges up to 100V for electric vehicle use, depending on the beacon
- LED and xenon options for high voltage applications
- Up to 5 mounting options depending on the beacon

- Dual voltage 12/24V
- Vibration protected circuit and impact resistant lens
- Very low power consumption
- Long life and maintenance free
- High voltage transient and polarity reversal protection
- Operating temperature: -20°C to +55°C

## Gamma

A 6W Xenon amber beacon with flexible single bolt base, suitable for fleet, road maintenance, agriculture, construction plant, utilities, large vehicles and refuse trucks.

# Minibars

Choose from four styles of minibar for the cost-effectiveness of a beacon combined with the visibility and performance of a full size lightbar. These compact bars are up to 400mm long, perfect for easy fitting to smaller vehicles or a magnetic mount option where drilling is unsuitable.

## BLAZE

The original Blaze Bar features a high profile (142mm), high visibility lens, whilst the ultra-quiet bearing assembly makes this the industry leader in low noise rotator devices. Choose from rotator or high power xenon options – both available with ECE R65 approval.

## BLAZE II

The Blaze II minibar features a high visibility ribbed lens and modern low profile design at a height of only 110mm. Choose from ECE R65 rotator or double flash xenon, with magnetic or permanent 1 bolt and 2 bolt mounting.

## PULSAR XENON

A choice of ECE R65 or low cost xenon minibars with either synchronised or alternating strobes. Suitable for many vehicle applications. Available as magnetic or permanent 2 bolt mount.

## REFLEX™

The latest LED minibars from ECCO provide a 70mm high compact yet powerful warning solution offering the flexibility of either 1 or 2 bolt or magnet mounting and the choice of 18 user-selectable flash patterns. Available as a high output 5580 model or the new 5565 super-bright ECE R65 model.

# Lightbars

Vision Alert offers an extensive range of lightbars, all manufactured in the UK with Vision Alert quality and backed by Vision Alert's high standard of customer service. New for 2013 are the 5 Series, 15 Series Lux, 65 Series LED and the innovative 70 Series LED rotator bars. Vision Alert also offers a bespoke design and build service to cater for the requirements of any application.

## 5 SERIES

Derived from the Delta Design programme and adopting the 5 Series configuration, this lightbar range features the traditional xenon light source and is now complemented with a rotator version – both of which are ECE R65 approved. The longest opal centre section available on any of our bars allows for numerous signage options. Vision Alert has driven down costs whilst retaining the simplicity and reliability of the original design to make this a truly cost-effective bar.

## 15 SERIES

Still regarded as THE solution for ultra-low profile bars, at only 50mm tall the 15 Series LED lightbar offers high intensity LED warning with modern, low profile aerodynamic styling. New for 2013 we have updated the range to include an opal centre section and high power Lux LED modules which achieves ECE R65 performance. Available in Class I and Class II with optional configurations also available.

## 60 SERIES

The 60 Series lightbar is a high performance, cost-effective lightbar solution offering a wide choice of lighting options. Since its launch Vision Alert has designed over 2,000 different combinations and variations of this bar for discerning customers across the world. Custom centre section signage options are available on request. Clear and amber lens options.

## 65 SERIES

The 65 Series now offers a mid-profile lightbar solution with a recognised and trusted aluminium base, state-of-the-art LED and optic technology that makes this the brightest ECE R65 approved bar in the Vision Alert range.

## 70 SERIES

The 70 Series lightbar offers an economical yet effective high profile lighting solution. This bar has been widely regarded as being the definitive lightbar in Europe for the past ten years. Vision Alert has designed and produced over 3,000 variations of this bar. Now 2013 sees the launch of the 70 Series RotoLED option that brings this bar into the 21st Century and is a unique innovative design solution only available from Vision Alert. ECE R65 approved option in amber.

# Create your own

## Complete design, build and testing service from Vision Alert

We have over 4,000 lightbar designs already filed and ready to build, but if you can't find the bar of your choice in this catalogue then we can build one for you to your exact specifications.

## 5 SERIES

### Features

- Dual voltage 12/24V
- Double flash end strobes or rotators
- Five lengths available: 610, 860, 1110, 1360 and 1610mm
- Long life Xenon flash tubes
- Quiet and reliable belt drive on rotators
- Certified to ECE R65
- High voltage transient and polarity reversal protection fitted
- Illuminated centre section available
- Various mounting options available

### Bespoke options available

- Worklights
- Magnetic base
- VigiLEDs
- Alley lights
- Signage on request
- Centre illumination
- Integrated siren option available 40W or 80W

### Bespoke lightbars can be designed on request

If the specification you need for a lightbar isn't shown in this catalogue, we can make one for you.

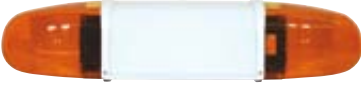

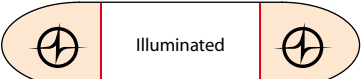

Simply contact Customer Service to discuss your requirements and our design team will create a bar best suited to your needs.

# 15 SERIES

## Features

- Low profile aerodynamic styling with high intensity ultra bright LEDs
- Low current draw (less than 20% of a standard halogen lightbar)
- Long maintenance free life
- 360° light output with increased dispersion at peak output
- Rigid aluminium base
- Polycarbonate lens
- Only 50mm high
- Amber and blue lids available on request
- Various mounting options available

## Bespoke options available

- Worklights
- Alley lights
- Coloured lids
- Stop tail
- Stop tail indicators
- Signage on request
- Opal or plain centre sections

### Bespoke lightbars can be designed on request.

If the specification you need for a lightbar isn't shown in this catalogue, we can make one for you. Simply contact Customer Service to discuss your requirements and our design team will create a bar best suited to your needs.

# 65 SERIES

## Features

- Low profile styling with high intensity ultra bright LEDs
- Low current draw less than 20% of standard bars
- Long life LED technology ensuring that the bars are maintenance-free for years to come
- 360° light output with increased dispersion at peak output
- Rigid aluminium base a standard with 60 Series bars
- Tough polycarbonate lens
- Well protected and proven protection against water and dust ingress
- ECE R65 Class I and Class II amber versions available
- Multiple LED options available, each module contains 6 powerful amber LEDs
- Cruise function available
- Opal or clear centre sections available
- Various mounting options available

## Bespoke options available

- Worklights
- Centre illumination
- Stop and tail lights
- Stop tail and indicator lights
- Signage on request

# 65 Series Lightbars

## 65 Series

The 65 Series is the new lower profile LED version of our 60 Series lightbars. We have developed completely new lenses and high power LED modules. Utilising the latest LED technology and a unique optic provides the 360° light distribution required to achieve ECE R65 Class I and Class II approvals. Combining fabulous style, versatility, high performance and a trusted chassis, this new bar has it all. A new unique controller allows for extra modules to be added if required.

Part No.	Volts	Centre	Length (mm)	Modules
<b>65-00001-V</b>	12/24	Clear	630	8 x 6 LED modules
<b>65-00002-V</b>	12/24	Opal	1060	8 x 6 LED modules
<b>65-00017-V</b>	12/24	Opal	1275	4 x 6 LED modules
<b>65-00003-V</b>	12/24	Opal	1275	8 x 6 LED modules
<b>65-00004-V</b>	12/24	Opal	1435	8 x 6 LED modules
<b>65-00005-V</b>	12/24	Opal	1590	12 x 6 LED modules
<b>65-00006-V</b>	12/24	Opal	1890	12 x 6 LED modules
<b>65-00007-V</b>	12/24	Opal	2160	12 x 6 LED modules

- All of the above products are ECE R65 Class I  
Class II available on request

### Bespoke lightbars can be designed on request.

## 70 SERIES

R65

### Features

- High profile modern styling
- Free form designed reflectors that give an even intensity over greater areas, providing up to 20% improved light output compared to leading competitors
- Dual voltage user selectable belt positions for 12 and 24V applications (only available when other non voltage items included in the bar)
- Aluminium base (only available when other non voltage items included in the bar)
- Polycarbonate lens
- ECE R65 options available
- Various mounting options available

### Bespoke options available

- Worklights
- VigiLEDs
- Alley lights
- Stop and tail lights
- Stop tail and indicator lights
- Centre illumination

# Worklamps

2011 saw worklamps launched by the whole ECCO Group which was possible because of the years of ECCO engineering expertise in LED developments. 2013 sees a further leap in both the range and performance of the ECCO Group worklamps.

Moreover our expertise in LED technology has enabled us to specify combinations of LEDs from chosen LED manufacturers that maximize performance and price, enabling ECCO Group to become even more competitive in the market. As LEDs improve you can be assured that ECCO Group and Vision Alert are at the very forefront of developments to ensure you have the most cost-effective, versatile and superior performing worklamps on the market today.

## HALOGEN

The standard for worklamps for many years, halogen lamps provide good performance at a price to suit all budgets, ranging from single or twin beam lamps, square, rectangular, round or oval designs and even magnetic mounting versions, these classic designs offer illumination for all vehicle types.

## HID

Once heralded as the ultimate solution, HID (High Intensity Discharge) lamps always came at a substantial price. Providing a superior lighting performance from only 35W of power, HID lamps offer around 2 ½ times the output of halogen and are ideal for operators of large construction and mining machinery or operators of equipment in very low light conditions.

## LED

LED worklamps have only been on the scene for the past 5 years but in that time they have caught up and overtaken halogen for performance and some of our high output lamps are matching HID for light output. More than that LED developments have progressively brought prices down to a point where LED is now competitive with halogen... AND with a fit-and-forget capability. With LEDs lasting upwards of 50,000 hours there's no need to mount them in accessible places to change bulbs. ECCO Group have the single largest range of LED worklamps on the market today, all backed by our quality assurance and technical support. The range includes square, rectangular, round and oval lamps, small 600 lumen devices comparable with halogen output, through to 3000 lumen versions.

Standard light output  
<1,000 Lumens

High performance light output  
1,000 - 2,000 Lumens

Ultra performance light output  
2,000+ Lumens

# Reversing Safety Systems

Vision Alert offers the most comprehensive range of reversing safety products on the market today. Designed specifically with the commercial and industrial vehicle operator in mind the broad range of alarms, CCTV, mirrors and sensors captures every requirement that demanding highway, construction, mining, material handling and agriculture applications need every day.

## ALARMS

ECCO Group is the world leader in reversing alarms, supplying to the most respected OEMs who demand complete confidence in the safety of their vehicles. After 40 years of designing and building alarms, ECCO has developed an engineering and assembly know-how second-to-none. Supplying to over 60 countries worldwide, all ECCO reversing alarms are certified to SAE J994 and now for 2013 ECCO offers the 'sshh sshh' sound with its Multi-Frequency alarms... the only ones worldwide to be certified to SAE J994.

## CCTV TECHNOLOGY

Flexible camera and monitor combinations allow you to create the perfect system for your vehicle. With a wide range of the latest technology monitors, cameras, accessories and cables, the options are endless. The Vision Alert CCTV range is packed full of premium product features, including touch control technology and remote control operation, all designed to satisfy the needs of all commercial vehicle operators whether they be a goods vehicle, tow truck, farm equipment or construction machinery.

## MIRRORS

Comprising the three most popular universal mirror selections, Vision Alert offers a wide angle round and half round mirror where space is at a premium, along with a Class VI front safety mirror. In addition Vision Alert offers three rugged mirror arms to mount the mirrors in the safest and most effective position.

## REVERSING SENSORS

Vision Alert offers the two most popular kits designed entirely around the needs of heavy vehicle operators. With wireless operation and easy to use controllers and indicator screens, the range comprises a medium duty kit for mounting into metal or plastic bumpers kits, along with a truly heavy-duty kit with sensors mounted into die cast metal housings for flexible mounting options on every type of vehicle.

# Reversing Alarms

Noise Pollution Solutions™

## How Smart Alarms® adjust to the environment

The alarms featured on this page constantly measure ambient noise and adjust their sound level to 5 dB(A) above, creating a volume that is safe without being annoying or contributing to noise pollution.

## Multi-Frequency Alarms

The Multi-Frequency back-up alarm provides a solution to potential noise pollution created by back-up alarms in confined or densely populated work areas. The Multi-Frequency alarm maintains a safe warning signal for those in the danger zone of backing vehicles while minimising disturbance to work site neighbours. The Multi-Frequency alarm operates by emitting sound at multiple frequencies attenuated above 4000Hz so that the sound is perceived to dissipate more quickly than a conventional pure-tone alarm.

In addition, driver technology used in the EA7020 and EA7070 models extends the life expectancy of the alarm, so much so, that a vehicles life warranty is offered.

### Features:

- Universal mounting bracket maximises location options
- Lead wire
- Sealed in epoxy for protection against dust, moisture and vibration
- Temperature range: -40°C to +85°C

- Pixels 512 x 582
- Lens angle 120°
- Operating temp -20°C - +70°C
- CCD technology
- 4 pin

**DAC1007**

### Dome Camera

**Features include:**

- Pixels 512 x 582
- Lens angle 120°
- Operating temp -20°C - +70°C
- CCD technology
- 4 pin

Internal use only

**DAC1008**

### Mini Camera

**Features include:**

- Day/night sensor
- Pixels 640 x 480
- Lens angle 90°
- Operating temp -20°C - +60°C
- Cmos technology
- 4 pin

**142-051**

### ECCO Brand Camera

**Features include:**

- Day/night sensor
- Pixels 500 x 580
- Lens angle 120°
- Operating temp -20°C - +70°C
- CCD technology
- 4 pin

**EC2014-SVC**

# Blind Spot Mirrors

## Universal Half Round Safety Mirror

160-001

Universal, half round safety mirror for use on fork lift trucks, construction equipment and agricultural machinery.

**Material:**  
Glass lens, High Impact resistant ABS mirror body

**Suitable for mirror arms:**  
10mm-20mm diameter

## Universal Direct Mount Mirror Arm

160-101

340mm

## Universal Safety Mirror

160-002

Universal safety mirror for use on construction equipment and agricultural machinery.

**Material:**  
Glass lens, Black powder coated aluminium body

**Suitable for mirror arms:**  
10mm-20mm diameter

## Universal Construction Vehicle Mirror Arm (Long)

160-102

650mm

## Front View Safety Mirror

160-003

"E" approved class VI front view safety mirror. The spherical radius lens gives a constant image allowing for accurate judging of distances. Approved to 2005/27/EC, this relates to the type-approval of devices for indirect vision and of vehicles equipped with these devices.

**Material:**  
Plastic lens, High impact resistant ABS mirror body

**Suitable for mirror arms:**  
10mm-20mm diameter

## Universal Construction Vehicle Mirror Arm (Short)

160-103

360mm

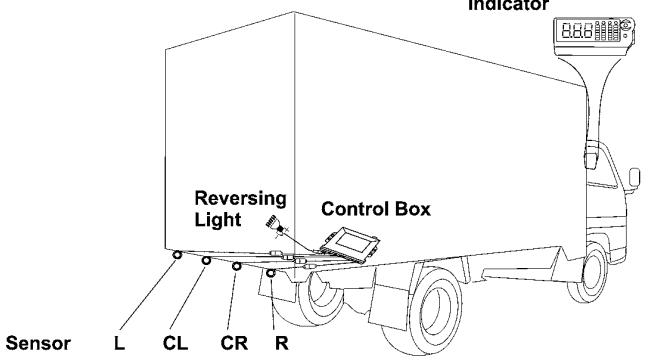

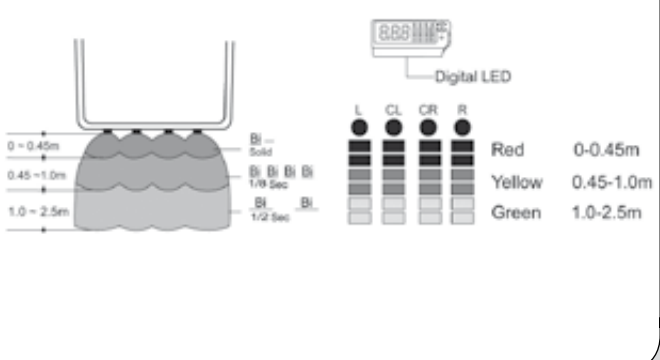

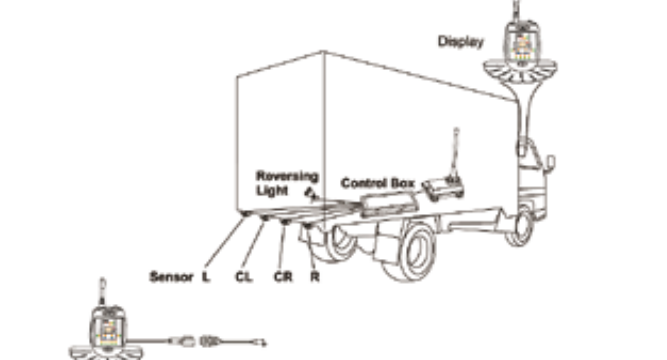

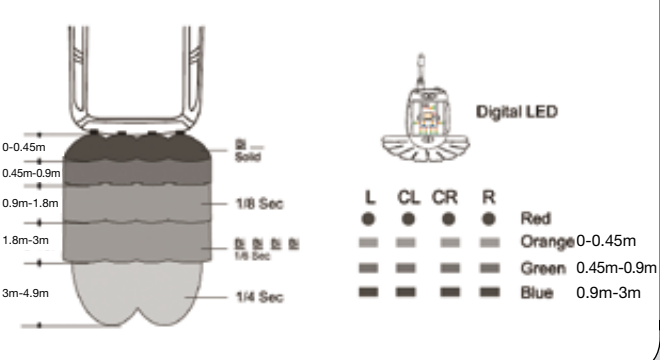

Universal fixing method

# Reversing Sensors

- Reversing sensor kits suitable for light to heavy goods vehicles
- Utilising the latest RF technology
- Robust and reliable

Wireless Medium Duty Reversing Sensor Kit		12/24V
		<p><b>Connection:</b> Wireless (RF)</p> <p><b>Operating temp:</b> -20°C to +80°C (sensors)</p> <p><b>Kit contains:</b> Display, control box and 4 sensors</p>
		<p><b>150-201</b> for plastic bumpers</p> <p><b>150-202</b> for metal bumpers</p> <p>EMC</p>
		

Wireless Heavy Duty Reversing Sensor Kit		12/24V
		<p><b>Connection:</b> Wireless (RF)</p> <p><b>Operating temp:</b> -40°C to +80°C (sensors)</p> <p><b>Kit contains:</b> Display, control box, transmitter and 4 sensors</p>

# Sirens, Speakers and Message Display

As part of the ECCO Group, Vision Alert's range of sirens and speakers are backed by the expertise and experience of Hazard Systems, a global market leader in the sirens market.

Our sirens are able to generate a wide range of tones, complying with most European siren tone specifications.

## Premium Siren Amplifier

Use in conjunction with the 385-030 world renowned SLIC controller to control your siren and lightbar. This combination can also be used to control a wide variety of lighting systems.

### Features

- Voice record / Playback
- Wail, yelp and hi-lo tones, user selectable
- Public address – volume control and microphone
- 8 x lighting control relays – user configurable
- Over voltage, over temperature and polarity protected
- Can be configured for Airhorn or phaser tones
- 60 Watt or 100 Watt output
- Softstart siren
- Radio re-broadcast
- Manual wail

Siren Amplifier Kit 1000 Series		12V	24V	
	385-026	385-027	<b>Full Kit</b>	(includes all components listed below)

VA 150 Siren			
	385.003	12V	
	Phaser, wail, yelp Public Address microphone		

CS200 Series Sirens			
	CS201		12 or 24V versions available Up to 200 Watts output Siren/tone scroll, air horn, cancel
	CS202		CS202 adds 3 warning level buttons, manual siren, radio re-broadcast, lighting control button, customer specific tones available on request

Bumper Speaker			
	385.033	Speaker 128dB under bumper	
	100W		

Speaker			
	385.034	Flat Speaker	
	For up to 100W siren amp		

100W Speaker			
	385.010	11 Ω nominal impedance	

Bespoke options can be designed on request.

## LED Message Master

### Warning Sign Matrix

Featuring new electronics, latest surface mount LEDs, bespoke optics and a new touch screen OLED control panel this product takes the message display into a new age.

LED Message Master Controller	Kit Part No.	Voltage	LED Colour
	HD0012R	10-30V	Red
	HD0012W	10-30V	White
	HD0012A	10-30V	Amber

**Message Master LED Display Panel**

EMC

#### LED Display Panel features:

- New low profile design
- IP67 sealed enclosure and connections
- High brightness LED display with extra wide viewing angle
- Innovative optical design to improve legibility and reduce sunshine washout
- Flexible mounting options – auto text rotation for mounting upside-down
- 10-30V operation

#### Control Box features:

- O-LED graphic touchscreen display
- Micro-SD message storage and firmware
- PC message programmer
- Adhesive tape mounting or swivel-mount option

# Accessories

Vision Alert's range of warning and safety products is complemented by a comprehensive range of auto electrical accessories. The range includes power supply units for xenon strobe devices, switch packs, individual switches, mounting adapters, along with a wide range of premium quality plugs and sockets for auxiliary components.

## PSUs and Flasher Units

Quantum PSU

	<b>200.051</b>	<b>12V</b>
	<b>200.052</b>	<b>24V</b>
	4 way switch pack 10 Amps max per switch @ 12V 5 Amps max per switch @ 24V	

### Keyless Running System

	<b>100.333</b>	<b>12V</b>
	<b>100.334</b>	<b>24V</b>
	System which allows the vehicle engine to continue running after the ignition key is removed. With anti-theft stalling feature.	

### Triple Power Socket

	<b>67601500</b>	<b>12V</b>
	Triple power socket with Universal Plug 16A, Connection possible to all cigarette lighter sockets and DIN standard sockets. 12-24V, 16A max. with three sockets. Internal Ø: 21mm Cable: 2 x 1.5mm <sup>2</sup> flat cable. Length: 2.0m	

## Switches

### Battery Isolator Switch

	<b>200.008</b>	<b>Battery Isolator Switch - 100A</b>
	100 Amp 24V (500 Amp for 5 seconds) Complete with removable key	

### Waterproof Switch

	<b>100.049</b>	<b>Push On/Off Waterproof</b>
	Waterproof push On/Off	

### Push/Pull Switches

	<b>200.009</b>	<b>Push/pull Switch - Red</b>
	<b>200.010</b>	<b>Push/pull Switch - Green</b>
	<b>200.014</b>	<b>Push/pull Switch - Amber</b>
	10 Amp @ 12V illuminated switch push/pull, plastic shaft, Red, Green, White & Amber	

### Toggle Switch

	<b>200.020</b>	<b>Toggle Switch</b>
	20 Amp @ 12V Toggle On/Off, Chrome	

### Illuminated Switch

	<b>200.023</b>	<b>Illuminated Switch</b>
	10 Amp @ 12V with interchangeable lens Red, Green, & Amber, dual voltage, supplied with 12V bulb, push/pull	

### Bendable Universal Plug with Switch

	<b>67746000</b>	<b>Bendable Universal Plug with Switch</b>
	8A/12-24V, with single-pole circuit breaker 8A, rocker switch imprinted with 0-I. The plug is bendable up to 180°, with screwed terminals, adaptor that can be firmly positioned by a bayonet catch, fitting for cigarette lighter and standard sockets.	

## Plugs and Sockets

Universal Plug		
	67713000	8A 12-24V Plug
	67713010	16A 12-24V Plug
	With maze-like strain relief 	

Universal Plug		
	67711010	16A 12-24V Plug
	With screwed strain relief

Safety Universal Plug Extension Cable - Helix		
	<b>67818100</b>	<b>8A 12-24V Safety Universal Plug Extension Cable - Helix</b>
	<i>With 0.6m - 3.0m Helix cable</i>	
		

Twin Socket Connector		
	<b>67879000</b>	<b>Twin Socket Connector</b>
	<i>Connection is possible in all sockets for cigarette lighters, two large sockets (interior Ø 21mm), 12-24V, 2 x 8A max. Integrated interchangeable 16A fuse. 2 x 0,75mm<sup>2</sup> flat cable, length 0.25 m.</i>	
		

USB Built-in Socket 12V DC / 5 V DC 1000mA		
	<b>67311000</b>	<b>USB Built-in Socket</b>
	<i>12V DC / 5V DC 1000mA with integrated power voltage converter, for charging and operating sat navs, smartphones, mobile phones, PDAs, digital cameras and devices suitable for charging by 5Volt USB. Fastening by plastic screw nut. Installation dimensions Ø 27.8mm, cable connection approx. 150mm pre-assembled.</i>	

## Fixing Kits

Roofbar Fixing Brackets		
	999.547	1 Bolt Beacon Kit
	999.568	Blaze Bar Kit
	999.569	Lightbar Kit – fits most roofbar sizes

High Lift Feet		
	905.010	Pair of stainless steel 100mm high lift feet
	905.011	Pair of stainless steel 150mm high lift feet

Pole Mount Bracket		
	100.056	Straight fixing bracket for DIN pole mount products with integral single contact socket

Pole Mount Bracket		
	100.057	Welded fixing bracket for DIN pole mount products with integral single contact socket

Pole Mount Bracket		
	100.058	Screw fixing bracket for DIN pole mount products with integral single contact socket

Pole Mount Bracket		
	100.059	Side fixing bracket for DIN pole mount products with integral single contact socket

Pole Mount Bracket		
	100.074	Fold down fixing bracket for DIN pole mount products with integral single contact socket
